## EVERY DROP COUNTS PART 1: Life Needs Water

1. Write down all the ways that you've used water so far today.
2. What are the three processes that our bodies require water for?
3. Water covers $\qquad$ \% of Earth's surface.
4. Is the quantity of water on Earth: Changing or Staying the Same (Circle one)
5. Record and define three processes in the water cycle.
6. In the pie chart below, estimate how much water is salt water and how much water is freshwater:

Let's check your answers:
Below is the amount of freshwater and saltwater:

Salt water: $\qquad$ \%

Fresh water: $\qquad$ \%

Icecaps \& Glaciers: $\qquad$ \%

Groundwater: $\qquad$ \%

Surface water and other (water vapor):
$\qquad$ \%
